Help

Keep

Fluorescent Lamps

out of the Landfill

It's as easy as A B C:

All Sussex County residents & businesses

Bring intact lamps to the Convenience Center for

Collection by our staff

Fluorescent lamps are considered “Universal Waste” and should be disposed of properly. Up to 10 lamps (tubes only please!) may be brought to the SCMUA Convenience Center at the Bagged Garbage Area for safe collection. Customers with larger quantities should obtain information from our Main Scale House or Convenience Center for suggested Universal Waste processing facilities. Compact & other fluorescent bulbs can be brought to any Home Depot or Lowe's at no cost, or held for the next SCMUA Household Hazardous Waste Day (6/3 & 11/4/17), or properly disposed of at authorized Universal Waste processing facilities.

**Broken Lamps can
release mercury and other
contaminates
into the air and water**

Compact Fluorescent Lamps (CFL's)
