

ATTENTION: SCMUA Solid Waste/Recycling Facility Staff  
FROM: Reenee Casapulla, Recycling/Marketing Coordinator  
DATE: December 1, 2020  
SUBJECT: SCMUA Guidelines for Recyclable Materials for  
Large Quantity Generators (LQG)  
(Commercial, Private and Local Government Recycling Haulers)

As you are aware the SCMUA has previously notified all Commercial, Private and Local Government Haulers that deliver recyclable material to the Solid Waste/Recycling Facility about banning unacceptable materials in the recycling stream.

As a reminder, the SCMUA requires all LQG that bring recyclable materials to the SCMUA Bulky Waste/Recycling Building to ***weigh in and receive a tag*** at the Scalehouse, for each load.

In addition, in an effort to capture only ***acceptable*** materials, any recyclables delivered to the SCMUA Facility cannot contain any of the following contaminants:

- Plastic bags/film/packaging material
- Construction debris (wood/metal/glass)
- Food waste
- Hazardous materials

LQG with contaminated material can and will be assessed re-loading and disposal charges, in addition to potential enforcement penalties, in accordance with the 2021 Rate Schedule.

Dedicated operations staff need to maintain clean recycling streams at the Solid Waste/Recycling Facility to ensure that the above requirements are adhered to.

Please contact myself, or Jon Morris for any questions regarding these recycling guidelines.
